RE: Open Internet Remand. GN Docket No. 14-28

Dear Ms. Dortch,

Please find attachments of a letter to Chairman Wheeler and eight (8) pages of signatures to the letter. These signatures were predominately gathered at our local Farmer's Market and represent people from the United States of America who believe that all residents should have equal access to a reliable and affordable Internet.

In our small community of approximately 280 households, there are many who do not have access to Internet services and even more who do not have cell phone coverage. This community is well educated and a contributing force in our area. We understand the issues and are thwarted by current practices of the Comcast and AT&T to have what we consider to be the basic services.

Thank you for seeing that our voices are heard during the comment period on an open Internet.

Best regards,

Barbara Ellis

**The Honorable Tom Wheeler, Chairman
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554**

Dear Chairman Wheeler,

We are members of a rural community in Northern California which has been denied the benefit of high speed Internet and reliable cellular phone service. We have been told by Comcast and AT&T that we do not represent sufficient revenue to warrant any investment in infrastructure to meet our needs. Just like the folks who lived in rural areas when the telephone was introduced, we need the benefit of the FCC to provide us with a service that is no longer a luxury but now a necessity for both professional and personal business. We request that the FCC redefine the Internet as a public utility subject to Title II Communications Act regulations. It is a telecommunications service.

Further, no speed tiers should be allowed. Everyone should have access to the fastest speed a provider can provide. No paid prioritization should be allowed other than for 911 services. We also oppose the Comcast-Time Warner Cable merger and any further telecom industry consolidation as we have seen firsthand the drawbacks of single providers in an area. Lack of competition hurts the public.

We do not believe our situation to be unique and would like this discrimination of rural areas to be stopped across our great country.

Respectfully submitted,

**Residents and Friends of Occidental
Sonoma County, California 95465**
